mantle-piece ever brought to this country. It is of s Asiatic possessions, on the 4th of July, and Mr. lack asked permission of the Governor to fire a dute of one hundred guns In honor of the day, at was refused. However, he borrowed all the unting he could procure and decorated his vessel ith a rainbow of colors, and invited the Russian ficials with their wives and families off to lunch, he afternoon was spent in target shooting with e fine Creedmore rifles belonging to the schooner. nd after the party had nearly used up the stock of nmunition, they left with many assurances of odwill and esteem. The schooner brought a load seventy-five cords of fire-wood. Pecunarily, he voyage has not been much of a success, but Mr. Black has gained that experience which will ensure him better luck next time. He expects to take in a cargo of sugar and to leave for San Fran-cisco in about two weeks.

VEGETABLE DETERIORATION.-It is a fact well known among all agriculturists, both civilized and barbarian, that a frequent change of seed is necessary to maintain a high state of perfection in the products of the soll. The native Hawailan does not like to plant his taro-tops in the same patch where they grew, but will, if possible, exchange with a friend whose garden lies a mile or two distant. If sugar-cane be planted year after year in the same field, it will inevitably run out, and an occasional introduction of fresh seed from another leiand is always found to be beneficial. The most striking exhibition of the advantages to be derived from an observance of this rule, was in the case of some Irish pointoes brought to the Gazerre Office last week by Mr. Laine. They averaged about half a foot in length, ane as regards quality they were ever more remarkable than for size. Such mesic, delicious potatoes we have never before eaten in this country. They were raised in Makawao from Caliborais seed, and contrasted with the little bullet-like murphys grown from native seed on the same ground, they looked like giants among pigmys.

The meals unbroken for 10 years.

but the great powers are still at work and it is thought she will consent to an uncouditional arm-It is reported that Russis, Austria, and Germany have entered into a secret treaty, in regard to a pur-

tition of a portion of Turkey. The title of the "Empress of India" is to be proclaimed in India with great ceremony, and a week of rejoleing.

THE HAMMOND MASSACHE.-The Charleston (S. C. News and Courses is determined to take nothing lands that it has said about the Hamburg slaughter. The Newberry Democratic Convention passed resolutions condensing its course, and a meeting of the Edge-field Democracy followed smit. To those bodies respectively and collectively the News and Courses says: In the eyes of the respectable white citizens south Carelina the killing at Hamburg was a berrib erime. For ourselves, we demonsted it and repud ated it, and in so doing we expressed, we are confident, the epictors of our public. We have no apologies to make, or back track to take. What we did was right, and we stand or fall by it. Let the line be sharply drawn between those who appland the dark deel and those who condemn it. Lut those, if there be any, who want more riot and murder speak out at once! Let those who think that it is right to hush up a wrongful act, because white men are guilty of it, come our squarely and say so. We are ready to make this the issue in South Carolina. We are de-termined to go on to the end, denouncing whatever is vite or dashonorable, whether the offenders be De-moerate or Republicans. And we do this in the interests of public morality.

BELGRADE, September 11th .- Though accounts of some Turkish outrages are unhappily too well es-tablished to be doubted, a fair idea of the proceedings of the Turkish forces is not to be gathered from the fearful tales so carefully collected. An English gentleman who passed through the Servian Dis-trict lately reports that he had many opportunities of talking with the people whose bomes and been in the hands of the enemy, and he met no single case

of gross outrage. Refore the publication of the orders rendering soldiers mutilating themselves liable to the psculty of death or imprisonment for life, many Servinas had already been arrested for that offence, and on one occasion as many as forty in a batch were executed. There are hospitals, it is said, in which more than half the patients are of that class.

Mannin, September 11th, -The following are additional particulars of the arrest of Tweed: Capitain General Jovellar, at Havana, received intelligent that Tweed had disembarked at Sanlings de Culia and notified the authorities there. Before the latte ould take action Tweed embarked on the sailing ver-sel Carmèn, bound to Vigo. Captain General Jovel-lar telegraphed to the Madrid Government, which fearing the Carmen might go to some other port, requested the authorities at all the other Spanish ports to examine the passengers on board all the vessel manual Carmien, there being twelve Spinish vessels at that rame. A postrait of Tweed being indispensable the Spanish authorities obtained and made copies of a carriature in as American journal, representing him as heating a child, supposed to typify American justics. This caricature led the Spanish authorities and superiors of the Spanish newspapers to believe that he had been kidnapping children; hence in the the details of a little gambling affair which recently occurred on King street. One of the gentry was some affair which recently occurred on King street. One of the gentry was some affair which recently occurred on King street. The New York Tribune compares wages in 1876 and 1876 for 60 trades, and reckons the decrease at from 16 to 20 per cent, while the reduction in rent and the necessaries of life has been more than that. It concludes, therefore, that there has been an actual increase in absolute wages—that is, that the same amount of work will buy more of the necessaries of life now than in 1878-74.

The English universities are the product of goare the product of greater munification. That among us is almost unknown. The general notion of an Englishman when he gets rich is to found an estate and benefit his family. The general notion of an American when fortunate is to do something for the good of the people, and from which benefits shall continue to flow. The latter is the nobler ambition.—Prof. Huxley. bition .- [Prof. Huxley.

There are two artists who are particularly fond of the great Zeological Garden in London, and who make it vary useful in their work—Tenniel and Dore. The moment Dore gets to London he rashes off to the Zeo. Tenniel has used nearly all the notable animals in his favorite Punch carteons. Tenniel, it is said does not pose in any fashion. He is simply an intelligent looking gentleman—resembles a country-lawyer, or an engineer with a new railway bridge on his mind.

It is no secret that the friends of Bristow her abouts assert positively that if Hayes is elected, Bristow will be again made secretary of the treasury, and this boast, taken in connection with Schurta's Gereland speech, is a prediction that the party, under Hayes, would be Bristowized, and "the party satraps," who have controlled it under Grant, be

outlawed. Mmc.
